(54) Title: DISPLAY PIXEL, DISPLAY APPARATUS HAVING AN IMAGE PIXEL AND METHOD OF MANUFACTURING DISPLAY DEVICE

(57) Abstract: In a pixel for displays capable of simplifying manufacturing process, a display apparatus having a simplified pixel structure and a method of manufacturing a cost competitive display device, a display pixel includes a channel layer (212), first to third (214, 216, 217) signal lines, first (213) and second (215) insulating layers and a pixel electrode (218). The first signal line (214) is formed on the first insulating layer (213). The first insulating layer (213) insulates the channel layer (212) from the first signal line. The second insulating layer (215) insulates the first signal line (214) from the second (216) and third signal lines (217), and includes contact holes (213a, 213b). The second and third signal lines (216, 217) are connected to the channel layer (212) through the contact holes (213a, 213b). The pixel electrode (218) including indium zinc oxide (izo) is formed on the identical layer with the first (214) and second signal (216) lines, and disposed on the second insulating layer (215). Therefore, manufacturing process is simplified and manufacturing time is reduced.

INTERNATIONAL SEARCH REPORT

International application No.
PCT/KR 2003/002677-0

CLASSIFICATION OF SUBJECT MATTER

IPC⁷: H01L 21/285, H01L 29/786, G02F 1/136, G09G 3/36

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC⁷: G02F, G09G, H01L

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

EPODOC, PAJ, WPI, English Fulltext

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	US 5341012 (MISAWA, OSHIMA) 23 August 1994 (23.08.1994) <i>fig. 3B, fig. 4A-D, and description page 6, line 35 - page 9, line 7.</i>	1,2,6
Y	<i>esp. fig. 3B.</i>	13-27

☒ Further documents are listed in the continuation of Box C.

☒ See patent family annex.

* Special categories of cited documents:

„A“ document defining the general state of the art which is not considered to be of particular relevance

„E“ earlier application or patent but published on or after the international filing date

„L“ document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

„O“ document referring to an oral disclosure, use, exhibition or other means

„P“ document published prior to the international filing date but later than the priority date claimed

„T“ later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

„X“ document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

„Y“ document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

„&“ document member of the same patent family

Date of the actual completion of the international search
